

4/99

Dear Dr Jaffe,

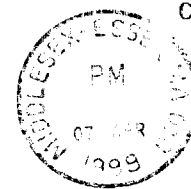

We support the petition to ban the forced molting of layer hens (docket 98P-0203/CP). The practice is unbelievably cruel, disgusting, and unnecessary. The eggs produced are not even as good quality as normal eggs. We will stop eating eggs until this practice is stopped. We will spread the word. Chickens are sentient, defenseless creatures that deserve the right to live out a humane existence as we all do.
